## Question

Are you able to provide information on what clinical grade of staff work on your rapid response vehicles / fast response units please as solo responders.

## Answer

Our rostered single crewed resources on A&E are staffed by either Paramedics, Advanced Paramedics or Advanced Nurse Practitioners. All of these staff are qualified and registered healthcare professionals, however in the case of advanced role, they can be undertaking further training.

Recognising the skills and experience within our Technician staff group, we have run a few short trials of a response vehicle staffed by a Technician.

Solo-responders can be backed up by an A&E vehicle where required; they also have remote support for clinical decision making.
